

## EPRV Series

### [Main Application]

- Solenoid proportional pressure reducing valve for main spool control and pump regulator control of control valve

### [Features]

- Removable structure of the secondary pressure tip allows for space saving of the oil channel.
- Superior controllability due to low hysteresis
- Easier maintenance due to cartridge structure

### ■ Specification

		EPRV
Structure		Cartridge Type
Max. Primary Pressure	MPa	6
Max. Back Pressure	MPa	1
Max. Flow Rate	L/min	10
Secondary Pressure	MPa	2.8
Solenoid Rated Voltage	V	24
	V	12
Pressure Control Type		Positive Control
		Negative Control

### ■ Outline Dimensions

		EPRV
A	mm	35
B	mm	94
C	mm	37
D	mm	46
